Version Control: Git, GitHub

Agile Development, Test-Driven Development (TDD)

Software Development Lifecycle (SDLC)

Work Experience:

Software Engineer

XYZ Software Solutions, Anytown, USA

June 20XX - Present

Collaborated with a cross-functional team to design and develop a scalable web application using React and Node.js.

Implemented RESTful APIs for data retrieval and manipulation, optimizing performance and ensuring data integrity.

Conducted code reviews, identified and resolved software bugs, and improved overall system stability.

Worked closely with clients to gather requirements, provide technical guidance, and ensure successful project delivery.

Software Engineering Intern

ABC Tech, Anytown, USA

Summer 20XX

Assisted in the development of a mobile application using React Native, contributing to the UI design and feature implementation.

Conducted unit testing and assisted in debugging to identify and fix software defects.

Collaborated with team members to create technical documentation and improve development processes.

Projects:

E-commerce Website

Developed a responsive e-commerce website using React, Node.js, and MongoDB.

Implemented user authentication, product catalog, shopping cart, and payment integration.

Optimized performance through code refactoring and database indexing.

Personal Finance Tracker

Built a personal finance tracker application using Python and MySQL.

Implemented user authentication, transaction recording, and data visualization.

Deployed the application to a cloud server and ensured security measures.

Additional Information:

Certifications: AWS Certified Developer - Associate

Languages: English (Fluent), Spanish (Conversational)
